Job Description

Dairy/AG Sales Consultant(s) needed to represent San Joaquin Valley renewable waste-to-energy and environmental solutions for SJ Valley Dairies, Feedlots, Farms, Cheese Plants and other food processors. Experience with and/or knowledge of dairies, dairy and farm equipment, manure handling, anaerobic digestion, gas pipeline equipment, reciprocating engines, microturbines, fuel cells, distributed electricity generation, waste water treatment, United States Environmental Protection Agency (EPA) / California / San Joaquin Valley air and water requirements and regulations a strong plus.

A strong opportunity for self-directed individuals to work directly with customers to educate them on the environment solutions available and how Dairy and AG waste may be turned into biogas and then into renewable green electricity.
